WORK EXPERIENCE

Software Developer, Sigma Staffing Solution Pvt Ltd.

Jan 2026 - Present

- Led backend development of **ProcessPulse**, an enterprise **multi-tenant HRMS SaaS** built with FastAPI and PostgreSQL, serving **20+ organizations and 10,000+ active users** in production.
- Architected the payroll engine end-to-end – configurable salary structures, a CTC calculation engine, dual attendance ingestion (portal or bulk Excel import), and **automated client invoicing**.
- Built an asynchronous processing pipeline using background workers, generating **3,500+ payslips per run (20,000+ total)** and delivering thousands of digitally signed appointment and appraisal letters with S3 archival.
- Architected and shipped **Job24**, a multi-tenant SaaS job portal using FastAPI, PostgreSQL, Redis, and S3.
- Designed a configurable **multi-level master data** framework with **Redis caching** and **RBAC** for job publishing, applications, and candidate visibility. Managed database schema, REST APIs, and **self-hosted Linux deployment**.
- Built a **configurable appraisal engine** with role-based question rendering and two-stage reviews.
- Engineered geo-tagged onsite check-in with **S3-backed receipt capture**, deriving inter-visit distance via the Google Maps API for field-sales expense and kilometre claims.
- Improved production API performance by optimizing database access (N+1 query elimination, selective field retrieval, pagination), partitioning large attendance tables, and ensuring concurrency-safe processing.
- Built **7 scheduled cron jobs** generating and mailing employee master, exit, absconding, and leave-tracker reports directly to stakeholders, redeploying 3 HR/ops staff to higher-value work.

Associate-Developer, Tech Mahindra

Feb 2024 - Dec 2025

- Architected a low-latency FastAPI microservice with **STT, TTS, and LLMs** for 50+ concurrent AI interviews.
- Spearheaded an end-to-end hiring platform using .NET Core MVC with MSSQL Server, automating JD generation, assessments, and feedback summaries via OpenAI APIs. **drove an est. 90% cut in hiring costs**.
- Enabled **multilingual interviews** across 10+ languages via intelligent model routing.
- Built Azure Blob Storage pipelines for interview recordings For Both Client Side and Server Side.
- Built 2 WhatsApp chatbots, **reducing workflow steps 75% and increasing engagement 50%**.
- Lead Team of 4 Through SDLC Deployed 3+ apps on Azure & VPS with Docker Compose and CI/CD.

PERSONAL PROJECTS

Hire-Me | Next.js, FastAPI, LangChain, LangGraph, LangSmith, MCP, JWT, PostgreSQL.

[Live](#) | [GitHub](#)

- Engineered a **multi-AI-agent pipeline to generate JD-specific job documents**, saving 95% of user's time.
- This application includes **JWT auth, GitHub OAuth**, history tracking, and credit-based generation.

Sudoku | Next.js, TypeScript, Node.js, Socket.IO, MongoDB, Redis.

[Live](#) | [GitHub](#)

- Orchestrated a **real-time multiplayer** Sudoku system enabling **2-player competitive** gameplay.
- Optimized data persistence with a **dual-model strategy and caching**, yielding over 80% faster delivery.
- Developed 3 core gameplay algorithms (**generator, solver, and validator**), generating unique puzzles.

Test Your Self | Next.js, JavaScript, Supabase (PostgreSQL), VAPI, Anthropic, and OpenAI .

[Live](#) | [GitHub](#)

- Constructed an AI-driven assessment app generating **practice interviews** with real-time evaluations.
- Generated actionable insights that improved user performance by 25%, **enhancing learning efficiency**.

EDUCATION

Bachelor of Technology - Computer Science and Engineering

Oct 2020 - Jul 2024

Krishna Institute of Engineering and Technology (KIET), AKTU, CGPA-**8.02** .

ACHIEVEMENTS

- Published a machine learning stress detection research paper in an IEEE journal, conducted at IIT Mandi.- [Link](#) .
- Received 3 consecutive quarterly "**Pat on the Back**" awards, recognizing exceptional performance.

SKILLS

- Programming Languages & System Design:** Python (Primary) | Low-Level Design (LLD), High-Level Design (HLD).
- Backend:** FastAPI, ASP.NET Core (.NET) | RESTful APIs, Backend Architecture | PostgreSQL, MSSQL, MongoDB.
- Infrastructure & DevOps:** Linux, Ubuntu, AWS (EC2, S3), Azure, VPS, Docker, Kubernetes, GitHub (CI, CD), Nginx.
- AI:** Generative AI, Agentic AI, RAG, MCP, LangChain and Langraph Ecosystem.
